

## Shell VSAT Replacement Options

# CYBERA OVERLAY VS. COOLBAND

Cybera offers two very different Shell-approved solutions for processing secure card payment transactions that are PCI-DSS compliant and offer a turnkey replacement of the VSAT satellite system.

### What Are My Options?

#### Cybera Overlay Solution

Cybera Overlay is a next-generation secure application platform that ensures critical store applications such as payment processing and loyalty are always able to communicate. Cybera Overlay integrates 3G/4G wireless connectivity as a failover to prevent service interruption and reduce opportunity for fraudulent activity.

#### Cybera Coolband Solution

Cybera's Coolband enables you to process credit/debit cards securely through a private broadband circuit to your retail location.

### What Does Each Option Provide?

	OPTIONS		CURRENT & FUTURE APPLICATION OPTIONS							SECURITY					SUPPORT & REDUNDANCY		
	Bring Your Own Broadband	Fixed Broadband Option	Shell Payment	Vendor POS Support (a, b, c)	Loyalty	Dispenser Support	Tank Guage Support	IDM Support	Secure Content Delivery	Managed Firewall	Shell VPN	Corporate VPN	Intrusion Detection	Remote Logging	24x7x365 Cybera Support	3G Wireless Back-Up	Serial to IP conversion support
Cybera Overlay	✓*		✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
Cybera Coolband		✓**	✓							✓	✓	✓			✓	✓	✓***

(a = Gilbarco, b = Verifone, c = Excentus)

\* Cybera Overlay will work over any broadband Internet option.

\*\* Cybera Coolband will only work over limited set of approved broadband connections

\*\*\* 3G wireless backup available with Coolband at an additional cost and with additional equipment

### What are the Costs of Each Option?

Cybera Overlay	Cybera Coolband Solution
\$79.00/month One-time equipment fee of \$350	Starting at \$100/month plus variable equipment costs depending on the broadband option selected
